Experiment 7: Cellular Network Performance Dashboard

Aim: To develop a dashboard prototype displaying performance criteria for a cellular system using Figma.

Procedure:

1. Create a desktop dashboard frame in Figma.
2. Add metric cards for throughput, latency, packet loss, and signal strength.
3. Insert charts to visualize network performance.
4. Add network status indicators and connection information.
5. Apply a consistent colour scheme and layout.
6. Preview the dashboard and test interactive elements.

OUTPUT:
