Experiment 9: GSM Service User Interface

Aim: To design a user interface prototype for a GSM service using Figma.

Procedure:

1. Create a mobile-sized frame.
2. Design screens for voice calls, SMS, contacts, and network status.
3. Add call, message, and contact buttons.
4. Include GSM signal and connection indicators.
5. Link the screens using the Prototype tab.
6. Preview and test the user interface.

OUTPUT:
