Experiment 10: Multiple Access Techniques

Aim: To create a visual representation showcasing the differences between FDMA, TDMA, CDMA, and OFDMA using Figma.

Procedure:

1. Create a comparison layout in Figma.
2. Divide the layout into four sections for FDMA, TDMA, CDMA, and OFDMA.
3. Draw diagrams illustrating frequency, time-slot, code, and subcarrier allocation.
4. Add labels explaining the working principle of each technique.
5. Highlight the key differences using colours.
6. Review the diagrams for clarity and technical accuracy.

OUTPUT:
