Experiment 11: Mobile Application Security Wireframe

Aim: To design a wireframe for a mobile application that incorporates security measures using Figma.

Procedure:

1. Create a mobile application frame.
2. Design a login screen with username and password fields.
3. Add OTP verification and biometric authentication screens.
4. Include password recovery and security settings.
5. Connect the screens to demonstrate the authentication flow.
6. Preview the prototype and verify the navigation sequence.

OUTPUT:
