Experiment 2: Mobile Station User Interface Prototype

Aim:

To design a user interface prototype for a mobile station using Figma, considering connectivity and convenience.

Procedure:

1. Create a mobile-sized frame in Figma.
2. Design a home screen displaying signal strength, battery level, and network status.
3. Add connectivity controls such as Wi-Fi, Bluetooth, and mobile data.
4. Design navigation buttons and settings screens.
5. Connect the screens using the Prototype tab.
6. Preview and test the interface.

OUTPUT:
