Experiment 3: Network Switching Subsystem (NSS) Flowchart

Aim:

To develop a flowchart depicting the operation of a Network Switching Subsystem in a mobile cellular system.

Procedure:

1. Create a new Figma design file.
2. Add flowchart symbols for start, process, decision, and end.
3. Represent subscriber authentication and call initiation.
4. Include call routing through the Mobile Switching Center (MSC).
5. Add decision branches for successful and unsuccessful authentication.
6. Connect all symbols with arrows and label the flow.

OUTPUT:
